Experience Summary

I am experienced in HTML, Css , Javascript, Java, Angular, and Android. I am also eager and open to learn new things.

Skills

1. **High Creativity.** Advised an organization on how they could transform their platform to better the customer experience.
2. **Problem Solving Skill.** Supported an organization in solving a problem they were facing in a certain work area with working solutions.
3. **Good Imaginative Skills.** When working with organizations, I see their products and what they could be, hence I work with the vision of the best possible future in mind.
4. **Good Public Speaking Skills.** I render my thoughts in ways that make sense and understandable by many and add my charisma to that and you are guaranteed never to forget my presence or message.

Project Summaries

In the recent past I have worked on different projects as showcased on my github profile, from e-commerce websites to courier services websites. I am currently working on a platform called Find Me, languages used were React for the front end and sanity for the back end. I have also worked on java projects some of which include a movie app and recipe app.

Relevant Work Experience

While in school I'd volunteer to create websites for businesses of people around me, currently I create websites for private businesses at a cost, Companies I have worked with include Dzame Wehu Real Estate Company, Franic Properties among others.

Education

I earned certificates of finishing my prep, core and pro-Dev courses respectively at Moringa School, these courses well equipped me in languages such as CSS, HTML, Java and Javascript, Android and Typescript. I also learned how to work with different databases, working with others through projects and tons of soft skills. I am currently self-teaching myself React and Flutter. While getting my bachelors degree in software development.

Personal Interests

During my free time, I like to paint, draw, meditate and listen to podcasts, I also like to socialize, learn something about the people around me.
